Art Unit: 1773

1. The amendment filed 12/27/04 has been entered. Claim 1 has been canceled. New claims 4-6 been added. Claims 2-6 are pending in the application.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Page 2

Claim Rejections - 35 USC § 103

3. Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in view of Beverly et al (USPN 6,632,855) and in further view of Park et al (USPN 2004/0121077 A1) or JP 06293611 A or JP 10330654A or JP 11302119. The admitted prior art teaches a refrigerator comprising an outer case, and inner case and a heat insulating material disposed therebetween, wherein the inner case is formed from ABS containing nanosilver particles, but does not teach that the inner case includes a first and a second layer wherein the first layer which defines the inner space of the refrigerator comprises the nanosilver particles and the second layer is devoid of the nanosilver particles. However, Beverly et al teach a biocidal plastic material layer that may be used as a surface coating for a substrate or as a laminate or component of a refrigerator such as a refrigerator lining, door panel, shelf or storage box, wherein the biocidal layer comprises a plastic material that preferably includes a rubbery material such as ABS and preferably at least 0.25% by weight of a biocidal compound, such as based on heavy metals, especially silver, on inorganic carriers such as zeolites, and may be coextruded with a substrate material such as styrene copolymers like ABS or acrylic polymers based on the intended end use wherein the laminate provides excellent biocidal properties(Col. 2, lines 1-42; Col. 3, lines 27-36; Col. 4, lines 4-52; Claims.) Further, Park et al or JP 06293611 A or JP 10330654A or JP 11302119 A all teach that nano-sized silver particles having the instantly

Art Unit: 1773

claimed particle size are effective for providing high antibacterial or antimicrobial properties to a coating or resin composition at low weight percentages. Hence, one having ordinary skill in the art at the time of the invention would have been motivated to utilize a biocidal coating layer or laminate as taught by Beverly et al for the inner case of the refrigerator taught by the admitted prior art and further to utilize nano-sized silver particles having a particle size as taught by Park et al or JP'611 or JP'654 or JP'119 to provide high antibacterial or antimicrobial properties with low weight percentages while utilizing routine experimentation to determine the optimum amount of silver nanoparticles to provide the desired biocide or anti-microbial properties.

Response to Arguments

- 4. Applicant's arguments with respect to claims 2-3 have been considered but are moot in view of the new ground(s) of rejection.
- 5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 1773

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique R Jackson whose telephone number is 571-272-1508. The examiner can normally be reached on Mondays-Thursdays, 8:00AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on 571-272-1284. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
